

2026 CoRE Conference (February 2–4)
Biblical Exposition: The Whole Counsel of God for the Whole People of God

In the late twentieth century expositional preaching gained broad acceptance in the American church, and it continues to be practiced widely. Given cultural pressures and contemporary church trends, however, God’s people need regular encouragement to give biblical exposition its rightful place. This is true for pastors in particular but also for others who minister God’s Word in various settings, including women. The 2026 CoRE Conference aims at encouraging and equipping believers to expound Scripture with precision, fervency, and relevancy.
